

### **And finally, Question 101, a question to sum up**

Although this is clearly a very nasty disease for those who catch it, at the time of writing, it has affected just 6.5% of the population and claimed the lives of less than 0.2%.

In other words, it has affected only a tiny proportion of the population – tiny – especially since 97% of the people who have caught Covid have recovered.

And so, since in the preface to this book I have suggested that the best way to decide whether the actions that someone has taken are good or not, we should apply the God-given maxim of “By their fruits ye shall know them”, let us recap on some of the fruits that have been considered in this book:

1. Covid is no chance occurrence. It was clearly anticipated. Q.1.
2. It has been engineered by scientists. Q4.
3. It is not highly contagious. Q12.
4. It has affected only 1 in 500 in the UK. Q.15.
5. The deaths from Covid have been significantly overstated. Q17.
6. 97% of those who have caught it have recovered. Q.25.
7. The results from tests for Covid are seriously inaccurate. Q22 and Q88.
8. The reporting of this disease has been, and still is, nothing but propaganda. Q.23.
9. Doctors have been silenced for speaking out. Q24.
10. Using ventilators has made Covid patients suffer needlessly. Q. 33
11. Lockdowns, rather than improving the situation, have increased the deaths. Q.34.
12. Masks don't work. Q.39.
13. Masks make wearers more ill. Q.38
14. Protesters have been prevented from demonstrating. Q44.
15. Social distancing has also been deleterious to health. Q.45
16. Attendance at public worship has been forbidden. Q 47.
17. The vaccines have not been properly tested. Q.68.
18. The vaccines are not normal vaccines. Q.61.
19. The vaccines are ineffective. Q62.
20. Those who have been vaccinated have not been given back their freedoms. Q.67.

21. The drug companies that produce the vaccines have been given immunity from prosecution. Q.55.
22. Hospital wards have been closed. Q.83.
23. There have been 33,000 extra deaths of people who have been denied treatment for non-Covid complaints. Q.85.
24. Doctors are refusing to speak out for fear of reprisals. Q.75.
25. The young have suffered most dreadfully. Q.38.
26. The government refuses to listen to any alternative point of view. Q.22
27. The incalculable damage lockdown has done to our economy with eight million out of work or on furlough. Q.96.
28. The vastly increased debts that this country now owes. Q.96
29. The pusillanimity of our politicians who have done so little (nothing) to hold the government to account. Q.91.
30. The UK government has behaved like a dictatorship, and a communist dictatorship at that. Q.90.

Are these not all simply terrible fruits? In short, and as others have said, doesn't the whole thing stink? Indeed, when we consider the above "fruits", are we not entitled to judge that "An enemy hath done this", and indeed an enemy, our government, that is not only shamefacedly still doing it but also doing nothing to change direction, and all the while refusing us permission either to talk about it, or demonstrate against it?

Let's finish with:

### **A Message of Hope**

Many believe that the Devil is behind the Covid crisis. One thing I have learned from experience is that the Devil, while he is a bully, he is also an inveterate coward. This means that, if one stands up to him and tells others what he is doing, he will collapse into a pathetic heap of defeated ineffectiveness. One may be destroyed in the process but, by doing this, and with the aid of prayer, one can greatly diminish his influence.
