

Title Information Sheet

Covid Crisis.

101 Unanswered Questions

Despite government assurances, many thousands of medical specialists have spoken out against the way that the Covid Crisis has been managed.

Instead of being thanked for their concerns, these dissenting voices have been ignored by both government and media with some even losing their livelihoods for their audacity in speaking out. Thus their important messages have been suppressed and many are no longer available for public scrutiny.

This book has been written solely so that some of these important messages are kept alive and circulating. The author tries to present the alternative view to the Covid Crisis by asking 101 questions that the authorities have, so far, deliberately failed to answer.

Data:

ISBN 978-1-909650-21-3
Published – 5th April 2021
Format – C5
Binding – paperback
Pages – 92
Illustrations - four
Price £10 including UK post. £5 per copy thereafter.

Contents

The 101 Questions include:

- Is the virus naturally occurring?
- Is the virus highly contagious?
- Is the death rate so high that we need to destroy our economy in order to manage the disease?
- Is it really so dangerous that we need to shut down the world, forcing everyone to stay indoors and wear masks when shopping and at school?
- Is it also so dangerous that we must all be given a vaccine? And is the vaccine safe?
- The Great Reset – Is history repeating itself?

Four Appendices, a Glossary and an Index.
