

The Spike Protein is the reason why the vaccines might kill you

It normally takes over 10 years to make a new vaccine - This vaccine has been rushed.

No matter what you have been told there's no way they could have done all the tests they normally do in 10+ years in just a few months. Including waiting 9 months to see if children born to vaccinated parents are healthy.

The COVID-19 Virus is covered in Spikes - called "The Spike Protein". The new mRNA Vaccines get your body to produce millions of these "Spikes". There is no OFF button, once you are injected there's no telling when the body will stop making the Spikes.

The latest studies show that upto 75% of the vaccine leaves the injection site and travels in the blood all over the body. Potentially ending up in your ovaries, heart, brain and even bone marrow, which could lead to Blood Cancer (Leukaemia).

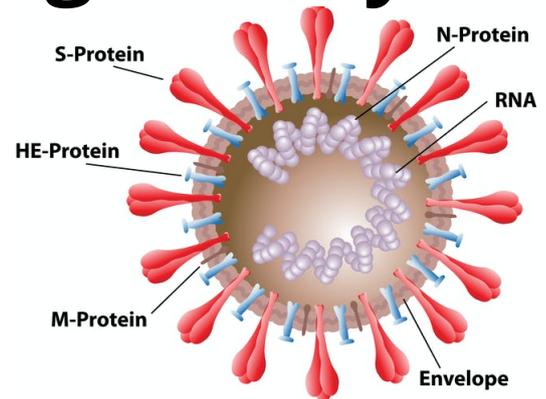

These "Spikes" are like having millions of tiny daggers inside your body. Many people have died from blood clots caused by the vaccines.

When they tested previous mRNA Vaccines in animals. The animals seemed fine at first. But when they were exposed to the real virus, their bodies over-reacted and they died.

Many people that died from COVID - died because their bodies over-reacted to the virus (this is called the cytokine storm) - Taking Vitamin D regularly (at least 4,000iu per day) will help prevent this over-reaction.

Flu season always occurs in winter when people cannot make enough Vitamin D from the sun. Taking Vitamin D is the easiest way to help reduce sickness from Flu / COVID.

Taking Vitamin D will also help reduce joint and back pain in as little as 2 weeks (take at least 4,000iu per day). As well as reduce your chances of getting Cancer, Heart Disease, Diabetes, Multiple Sclerosis and many other medical conditions. If more people took Vitamin D the medical companies would lose Billions in lost revenue.

Trust The Scientists

How many times have you heard the phrase "Trust The Scientists" but never seen anyone's name mentioned. Below are several Doctors & Scientists that warn against the vaccines.

Dr. Robert Malone - Inventor of the mRNA Technology - in June 2021 made a 3 hour video in which he says in great detail why the COVID vaccine is so dangerous

Dr. Michael Yeadon - Worked for Pfizer for 16+ years reaching the position of Vice President says these vaccines are dangerous

Dr. Geert Vanden Bossche - Worked in the vaccine industry his entire career says injecting millions of people during an ongoing pandemic is dangerous

Professor Dolores Cahill - from University College Dublin School of Medicine - Expects those that get injected to start dying or getting very sick within the next few years.

More Doctors that have spoken up about the dangers of the vaccines you can look up

Dr. Roger Hodkinson, Dr Byram Bridle, Dr. Peter McCullough, Dr. Zev Zelenko, Dr. Carrie Madej, Dr. Sherri Tenpenny, Dr. Stephanie Seneff, Dr. Lee Merritt, Dr Vernon Coleman, Professor Sucharit Bhakdi
